

Ayat Al Khulaqi

DATA SCIENTIST

Education	2019-2021	Multimedia University Diploma in Information Technology CGPA: 3.84
	2021-2024	Multimedia University Bachelor's in Computer Science (Hons. Data Science) CGPA: 3.62
Publications	27 th Feb 2025	Ayat Al-Khulaqi, Naveen Palanichamy, Su Chen Haw, and S. Charles Raja, "Evaluating Machine Learning and Deep Learning Algorithms for Predictive Maintenance of Hydraulic Systems", <i>Int. J. Adv. Sci. Eng. Inf. Technol.</i> , vol. 15, no. 1, pp. 52–59, Feb. 2025. https://doi.org/10.18517/ijaseit.15.1.12407
Skills	Data Science (Statistics, Data Analysis & Data Visualization)	R, Python, Tableau, Power BI, Metabase, data analysis, data visualization and creating dashboards using D3.js, CSS, and HTML.
	Business Analyst	Business Requirement Document (BRD), Software Requirement Document (SRD), UI/UX Document, QA Testing for frontend and backend.
	Web/App Development	JS, PHP, CSS, HTML, MySQL, Netlify, OpenAPI, GraphQL, Laravel, React Native, Node.js, and Bootstrap.
	Other	Visual Studio, GitHub, Jira, Microsoft Office 365, draw.io, Figma, Clockify, Excel.
PROJECTS	Bachelor Final Year Project	Predictive Equipment Maintenance in Hydraulic Systems Using Machine Learning. I designed and implemented a predictive maintenance model for hydraulic systems using machine learning (Random Forest, CatBoost) and deep learning (LSTM) using the ZeMA gGmbH dataset. Additionally, I created interactive dashboards using Power BI for visualizing system performance insights. The project emphasized model explainability, data-driven fault prediction, and industrial applicability.
	Diploma Final Year Project	I designed and developed a full-stack e-commerce web application using HTML, CSS, JavaScript, PHP, and MySQL. The system featured separate user and admin modules, enabling product browsing, user authentication, cart management,

order processing, and rating/review functionalities. Admin features included product and user management, order tracking, sales reporting, and comment moderation.

Work Experience

Business Analyst

Applab (Project)
Oct 2024 – Apr 2025

I worked on a seventh-month project titled Mehanty and Meydan, where I was involved in multiple phases of the software development lifecycle. My responsibilities included preparing comprehensive documentation such as the Software Requirements Specification (SRS), Business Requirements Document (BRD), and UI/UX design documentation. I actively contributed to both frontend and backend testing, ensuring the platform met functional, technical, and user experience standards. This role required close collaboration with cross-functional teams to align development efforts with business goals.

Backend Developer

ArchitWeb (Internship)
Jul 2023 – Oct 2023

I developed backend development competencies by working on various projects using tools like Jira, Laravel, and GraphQL. I enhanced my problem-solving and debugging skills and gained experience in collaborative development and project management using Jira and Clockify. Additionally, I improved my coding, web development, and data visualization skills with hands-on projects and tools such as Bootstrap, OpenAPI, and Metabase.

Application Developer

Creatixa Multimedia Solution
(Internship)
Mar 2021 – Jun 2021

I developed mobile applications using technologies such as React Native, Node JS, and Visual Studio. Gained hands-on experience working on two test applications and learned how to add packages, code with React Native, and add ads using Google Admob. Additionally, I wrote a proposal for a mobile application.
